THAMER SMIRI

MATHEMATICS & COMPUTER SCIENCE STUDENT

Second-year Mathematics and Computer Science (MI) student at the Faculty of Sciences of Tunis, building strong foundations in programming, algorithms, and software development. Interested in cybersecurity, artificial intelligence, and practical problem-solving. Earned the Tunisian Mathematics Baccalaureate in 2025 with Très Bien distinction.

EDUCATION

Second Year — Integrated Preparatory Cycle (MI) | 2026–2027 · In progress
Faculté des Sciences Mathématiques, Physiques et Naturelles de Tunis (FST)

First Year — Integrated Preparatory Cycle (MPI) | 2025–2026
Faculté des Sciences Mathématiques, Physiques et Naturelles de Tunis (FST)

Tunisian Baccalaureate — Mathematics | 2024–2025
Très Bien distinction

COMPUTER SCIENCE COURSEWORK

MPI · first year | 2025–2026

Completed first-year foundations: C programming (functions, pointers, dynamic memory, and file handling); algorithms and data structures including linked lists, stacks, queues, and trees; recursion and algorithmic complexity; introductory Windows/Unix command-line use; binary arithmetic, Boolean algebra, and digital logic circuits.

MI · second year | 2026–2027 · in progress

Current-year curriculum includes object-oriented programming concepts and C++, Python, a Java workshop, web development, database foundations and engineering, information-systems design, computer architecture, operating systems, local networks, and data transmission. These are current curriculum topics rather than completed coursework.

SELECTED PROJECTS

SecretAmongUs — Offline-first, local pass-and-play social-deduction game concept for one device; exploring Flutter/Dart, game logic, and multilingual flows. SecretAmongUs repository ↗

Scholar Hub — Student-led educational initiative for sharing learning resources, summaries, and exercises with Tunisian students. The site uses Python, FastAPI, Jinja2, and SQLite.

Personal Portfolio — Responsive multilingual website built with HTML, CSS, and JavaScript, with searchable certificates and keyboard-friendly navigation.

SELECTED CERTIFICATIONS & ACTIVITIES

- HackerRank — Problem Solving (Intermediate) skill certification.
- IBM Skills Network — Python 101 for Data Science; SQL and Relational Databases 101.
- SecuriNets FST — Cyber Camp 2026 and Local CTF participation (January 2026).
- Kaggle Learn — Intro to Machine Learning; cloud and high-performance-computing workshops.

Academic topics are listed as completed MPI foundations or MI curriculum in progress.
